

# SAEL INDUSTRIAL

Beside Paper and Steel there is the third division of SAEL with a Team who develops all the other applications. Since twenty years many the applications got life within Railway; Plastic and Rubber; Machine Tools; Test Benches; Automated dispensers applications. A tremendous variety of application requires 360° technical skills. This is the strength of the team working.

## INDUSTRIAL APPLICATIONS

Beside the core business lines SAEL is on expanding development policy where "new share gain" is the must. Actually looking out off the paper and steel industries there are many Industrial Application with specific needs as much as demanding performances. Here is our potential.

Below are listed a bunch of industries/application already developed upon specific engagements;

- Mining application;
- Railways application;
- Cement mixer automations;
- Plastic and Rubber extruders;
- Rubber banbury and calanders;
- CNC machines;
- Stackers and automatic dispensers;
- Special machine tools;
- Wooden machines;
- Test benches;
- Custom automatic machines.
